Mark Daniel Babaylan

Full-stack Developer | SWE | Building with AI Tools & Agentic
Systems

Leyte, Eastern Visayas, Philippines

Summary

Full-stack dev with 6 years across software, ops. Built systems at ArchIntel, Cloud Panda, and assisting in tech workflows across the family business. Looking for remote dev / software engineering roles. Outside work: 5 years of natty bodybuilding — tracking macros, weight, and lifts.

Experience

Barly Pharmacy
Technical Operations Consultant
February 2025 - Present (1 year 3 months)
Leyte, Eastern Visayas, Philippines

Direct operations support for family-run business. Handled compliance, payroll systems, and day-to-day tech infrastructure.

- SSS filing and compliance — monthly/quarterly reporting, payments, employee records
- Payroll processing and documentation
- IT support: hardware troubleshooting, vendor coordination, basic network admin
- Print operations: job scheduling, inventory, client order management

Basically: whatever needed doing to keep the business running. Multi-hat ops work.

ArchIntel
Frontend Developer
October 2023 - January 2025 (1 year 4 months)

Backend
Built Salesforce backends with Apex and Visualforce. Kept business processes running and fixed things when they broke.

Email Systems

Created email template endpoints for the admin team. They asked. I built it.

Frontend & Legacy

Updated UIs, built reports, and added features to old systems with bad documentation. Wrote docs so the next dev wouldn't hate me.

Multiple Projects

Juggled several workstreams using Jira and Basecamp. Kept tickets moving and teams unblocked.

Support

Answered technical questions from clients and users. Fixed what I could and handed off the rest with enough detail that engineers didn't need to ask twice.

Requirements

Took vague requests from management and turned them into specs the team could actually build.

Barly Pharmacy

Technical Operations Consultant

December 2021 - October 2023 (1 year 11 months)

Philippines

Operations Associate

Handled whatever the business needed. Jack of all trades, master of getting things done.

Logistics & Inventory

Drove for supply runs and restocking. Managed cash deposits and withdrawals. Handled physical inventory - loading, unloading, warehouse organization.

Customer Operations

Cashier work. Registered customers on e-wallet apps and troubleshooted their phone issues. Answered questions, resolved complaints, kept people happy enough to come back.

Admin & Compliance

Responded to emails. Did data entry. Filed government paperwork online - SSS, supplier portals, whatever needed submitting.

Property Management

Managed tenant issues - water, electricity, repairs. Handled booking inquiries and reservations. Cleaned units between guests when the crew was short.

Kitchen Backup

Cooked for the team when the regular cooks were out. Not glamorous but the work got done.

Cloud Panda PH

Software Engineer 3

August 2020 - December 2021 (1 year 5 months)

Philippines

Developer in team responsible for building & maintaining projects alone and/or with other teammates that help the internal team serve its customers better.

Also responsible with communicating with the QA testers, managers and the Boss regarding code fixes, project updates

PSBank Official

System Analyst

November 2019 - July 2020 (9 months)

System Development using React JS, .NET Core WEB API, SQL server and Oracle Database, Adobe Photoshop, Microsoft Excel and Word, Application support for the issues encountered in Daily Attendance Record, HR and Trust Division systems.

Tsukiden Global Solutions Inc.

Design Engineer Trainee

March 2019 - August 2019 (6 months)

Unit testing of C code snippets by setting up custom C code for testing along with custom tools, and Microsoft Word and Excel for documentation.

Helix Software Technologies

Computer Programmer

July 2018 - November 2018 (5 months)

Mandaluyong, National Capital Region, Philippines

Created website layout for their products using HTML, CSS, jQuery, SenchaJS and Bootstrap, brochure designs, company shirts and logo using Adobe

Photoshop, provided user support for their clients using Excel, MySQL and SQL Server.

AND Digital

Intern Back End Developer

January 2018 - April 2018 (4 months)

Ortigas

Assisted in updating design layouts for their software and email messages they send to their clients using HTML and CSS, Created a beer tap application using .NET framework Web API and AngularJS and researched about policies and requirements to take note when developing iOS apps.

Education

Colegio de San Juan de Letran

Bachelor's degree, Information Technology · (2014 - 2018)
